Prem Kumar JR

Test Engineer | Application Support & Automation

Nellithope, Puducherry | 9043429274 | premkumarrajendran07@gmail.com | Linkedin | Github

PROFILE

Application Support and Automation Testing Engineer with 5 years of experience delivering reliable solutions in enterprise environments. Skilled in incident management, troubleshooting, and workflow automation using ServiceNow, SQL, and Splunk for logs. Experienced in building Playwright automation frameworks integrated with CI/CD pipelines, reducing manual effort and improving release speed. Known for enhancing system stability, improving test coverage, and saving hours of manual work through automation. Strong focus on combining support reliability with modern testing practices to drive efficiency and product quality.

WORK EXPERIENCE

- Designed and maintained Playwright automation frameworks, building scalable test suites that reduced manual effort and improved overall test coverage.
- Integrated Playwright scripts into CI/CD pipelines, accelerating release cycles and ensuring consistent quality across deployments.
- Automated repetitive test cases and regression scenarios, improving testing efficiency and reducing turnaround time for releases.
- Developed Python-based workflow automation dashboards using ServiceNow APIs, enabling real-time visibility into system performance and reporting.
- Automated weekly ServiceNow reports with Power Automate, saving several hours of manual work each week and improving reporting accuracy.
- Managed incidents, problems, and change requests in ServiceNow, ensuring smooth operations and minimizing downtime through proactive monitoring.
- Performed root cause analysis using SQL queries, identifying recurring issues and implementing permanent fixes to enhance system stability.
- Documented solutions and created knowledge base articles, streamlining resolution processes and improving team efficiency while supporting change deployments.

PROJECTS

Project Description

Oct 2024 – Present

Worked on building a robust Playwright automation framework to support end-to-end testing across multiple modules of the H&M enterprise applications. The focus was on improving test coverage, reducing manual effort, and accelerating release cycles by integrating automation into CI/CD pipelines.

Playwright Automation Engineer

Tata Consultancy Services (TCS) – H&M Project

Key Roles & Responsibilities:

- Designed and maintained Playwright automation frameworks, creating scalable test suites for functional, regression, and API testing.
- Developed end-to-end automated test cases covering UI flows, backend validations, and API responses to ensure product reliability.
- Integrated Playwright scripts into CI/CD pipelines, enabling faster and more consistent deployments with reduced manual intervention.
- Automated regression scenarios, reducing manual testing effort and improving turnaround time for releases.
- Enhanced test reporting by generating execution logs and dashboards, providing stakeholders with clear visibility into test results.
- Collaborated with QA and DevOps teams to strengthen testing processes, improve release speed, and deliver higher product quality.
- Contributed to continuous improvement by adopting new tools and practices in automation testing, ensuring frameworks remained modern and efficient.

Project Description

Mar 2022 – Sept 2024

Provided end-to-end support for H&M enterprise applications, ensuring system stability, smooth operations, and faster issue resolution. Introduced automation into support workflows to optimize reporting, monitoring, and reduce manual workload.

Application Support Engineer

Tata Consultancy Services (TCS) – H&M Project

Key Roles & Responsibilities:

- Managed incidents, problems, and change requests in ServiceNow, ensuring minimal downtime and smooth operations for business users.
- Performed root cause analysis using SQL queries, identifying recurring issues and implementing permanent fixes to enhance system stability.
- Documented solutions and created knowledge base articles, streamlining resolution processes and improving team efficiency.
- Supported change deployments and coordinated with cross-functional teams to ensure seamless transitions with minimal disruption.
- Monitored system performance proactively to prevent outages and improve reliability across critical applications.
- Automated weekly ServiceNow reports using Power Automate, saving several hours of manual effort each week and improving reporting accuracy.
- Developed Python-based workflow automation dashboards leveraging ServiceNow APIs, providing real-time visibility into system performance and reporting.
- Assisted in user onboarding and training for ServiceNow processes, improving adoption and reducing support requests.
- Collaborated with stakeholders to prioritize issues and deliver timely solutions, improving customer satisfaction and SLA compliance.
- Ensured compliance with ITIL processes and best practices, maintaining high standards in support delivery.

EDUCATION

Bachelor of Technology in Computer Science 2021
Rajiv Gandhi College of Engineering and Technology
Pondicherry University
CGPA: 7.2

SKILLS

- **Web Technologies**: HTML, CSS, JavaScript
- **Automation & Testing Tools:** Playwright (end-to-end automation), Page Object Model (POM)
- **Version Control:** Git
- **API Testing**: Postman
- **Database:** SQL (queries, validation, backend testing)
- **Application Support Tools**: ServiceNow (incident, problem, change management), Power Automate (workflow automation, report generation), Splunk for logs

DECALARATION :

I HEREBY DECLARE THAT THE ABOVE INFORMATION IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE AND BELIEF
